unlocking the potential of oracle projects

## Oracle Projects-P6 Integration Proof of Concept

### Introduction

Projected Consulting have a unique offering which will allow you access to Pre-configured Oracle Primavera P6 and Oracle Projects environments featuring the new Primavera to Oracle Projects Integration pack. Oracle Projects is a group of modules within the Oracle E-Business Suite which now integrates with Primavera P6. Projected's Proof of Concept is a 30-day trial period on a stand alone server and will include five days training and remote support from an experienced Projected consultant. Also included will be best practice process flows, test scripts, videos and issue logging. This will allow you to analyse, review and test the benefits of a completely integrated project portfolio management system.

### AIA Process Integration Packs (PIPs)

### Benefits of Integrated Applications

#### Business Owners

- Speedy deployment through industry best practices
- Make better decisions with more timely, accurate information

#### IT Owners

- One vendor provides all solutions and the integration
- Reduces the risk of runaway custom integrated projects
- Avoid headaches associated with supporting custom builds

#### Finance Owners

- Minimise TCO, with a commercial software product
- Ensure accuracy of corporate data across enterprise systems

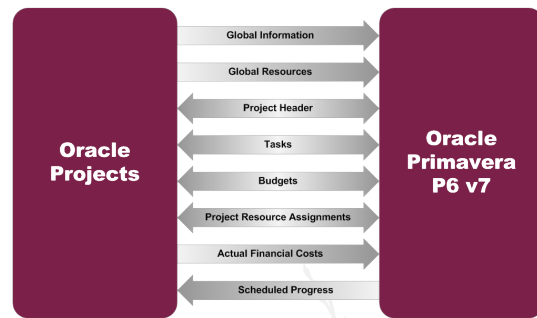

Prior to the release of the integration, companies were faced with silo'd business systems and were duplicating a lot of effort in Primavera and E-Business Suite. They had to duplicate project creation, task creation and resource assignments, and keep track of the progress in both systems while only being able to capture the actual costs in the E-Business Suite.

The integrated solution now brings together the best of both applications and keeps the project data in synchronisation. From sharing Global data in the E-Business Suite to the project creation and scheduling of resources, right through progressing the project and sharing actuals, the critical project information is shared between the applications and keeps the cost and schedule information together. This will lead to better decisions by project managers and accountants.

## Proof of Concept Value Proposition

You can view, analyse and test the Oracle Primavera integration with Oracle E-Business Suite on a stand alone server Projected will supply, allowing you to establish the benefits of a complete integration project portfolio management system.

Mitigate the risk of purchasing applications and integration early with "hands on" access to a sandpit environment with complementary best practice process flows, test scripts and consulting support.

## Approach

Projected Consulting are offering 30-days access to a stand alone server including pre-configured Oracle Primavera, Oracle E-Business Suite and the new Oracle Process Integration pack. This will allow you to analyse, review and test the Oracle applications and the integration for yourself, while providing you access to an experienced consultant to ensure you are fully utilising your initial investment.

## Business Processes and Application Modules

- Oracle E-Business Suite including Oracle Project Costing, Billing, Project Management and Project Collaboration
- Oracle Primavera P6v7 Professional Project Management Client Server and Web Services
- Oracle Project Portfolio Management Integration Pack

## Service Overview

- 3 days onsite access to an experienced Oracle Primavera and Oracle E-Business Suite consultant to assist you
- Access to process flows, videos, test scripts and 16 hours remote support

## Working Together

We will work with you to ensure that the server provides users with access to the latest Oracle Primavera, Oracle E-Business Suite applications and integration software. Our consultants will provide the tools and expertise to ensure that they understand the systems functionality and system test accordingly.

## Costs and Trial Period

Cost: £7,500 Trial Period: 30 days

## Key Benefits

- Reduced purchase risk– try before you buy
- Follow industry best practice process flows
- Understand integration and gaps
- Hands on experience of applications and integration
- Reduced implementation costs
- No hardware purchase
- No consultancy fees for installation
- No licence fees during trial period
- Early visibility of ROI
- If you buy and implement, Projected will discount the POC cost from future engagement
