unlocking the potential of oracle projects

## Project Analytics Proof of Concept

### Introduction

Oracle Project Analytics is an end-to-end analytics solution that provides users with in-depth Business Intelligence relating to their Oracle Projects data. To help organisations take full advantage of this robust analytics architecture, Projected Consulting offer a comprehensive service to help you efficiently and successfully complete a Project Analytics Proof of Concept.

Projected Consulting offer an attractive package to enable you to speedily deploy a complete Project Analytics Proof of Concept.

The Project Analytics Proof of Concept offering is a fixed-price, rapid deployment package that leverages best practices derived from our combined knowledge and experience of both Oracle Projects and Oracle BI Applications.

### Business Benefits

In just five days, members of your Project Management community will have access to a fully functioning Project Analytics test environment, deployed using a pre-configured Virtual Machine. This will enable your organisation to access timely, relevant and actionable insights derived from information within your Oracle Projects deployment.

Completing a Project Analytics Proof of Concept provides:

- 30 days “hands on” assessment of the comprehensive set of pre-built Project Analytics Dashboards tailored for Project Managers and Project Executives
- Access to hundreds of best practice metrics derived from your own Oracle Projects data
- An additional custom Dashboard containing up to four Reports can also be developed, with the aid of a desktop video presentation
- If required, a hosting service using Projected Consulting’s own secure server infrastructure can be used to simplify the hardware requirements for the Proof of Concept (not included in the base cost).

### Key Benefits

- Rapid deployment of an Oracle Project Analytics Proof of Concept giving access to numerous pre-built KPI's and Dashboards
- Expedient evaluation of the product
- Zero business impact
- Predictable cost and time frame

## Implementation Approach

Experienced consultants from Projected Consulting will work with your business and key resources to:

- Install the application and configure it for a single language (English)
- Deliver the pre-built Dashboards for analysis of:
  - Project Billing
  - Project Budgets
  - Project Costs
  - Project Forecasts
  - Project Funding
  - Project Profitability
  - Project Revenue
- Extend one Dimension table with up to two simple field extensions from Oracle E-Business Suite
- Extend one Fact table with a single field extension from Oracle E-Business Suite
- Create one Intelligence Dashboard to reflect customer specific look and feel
- Develop four new Reports (includes drill-down reports)
- Configure one Security Rule (based on EBS Security Model).

## Working Together

In order to achieve a successful implementation and drive business benefits in just 5 days we require organisations to provide:

- Executive sponsorship and support for the Proof of Concept
- Access to the key Business Representatives and Technical Support resources
- Hardware, software and security requirements prior to arriving on site
- Access to your data (if hosting service is utilised).

In addition, you need to ensure:

- The correct level of Oracle Licenses are in place for the underlying data
- Oracle Projects Patch Set M implemented.

## Costs and Implementation Timescales

Cost: £9,500

Timescales: 5 days
