

projected **consulting**

unlocking the potential of oracle projects

Consulting Services

Systems Implementations

Projected can provide experienced consultants to take you through each stage of the implementation process, including integrating your Oracle Projects suite solution with other Oracle and non-Oracle applications. Using proven methodology we can ensure a smoothly run implementation that captures all the necessary business process requirements.

Upgrades

Projected has extensive experience in planning and implementing upgrades to the OP suite. A full review of client business requirements is matched against existing and new functionality available, to ensure a seamless upgrade and a prompt take up of new functionality where appropriate.

Implementation Audits/Review

A professional implementation audit allows you to maximise the benefits of the Oracle Projects suite of applications while minimising the risks of deployment. Projected Consulting can help you identify and resolve potential limitations in your imminent or existing implementation. We will perform a review to measure the success of an implementation or upgrade. Recommendations and quick fixes can be offered by our team of both Functional and Technical consultants.

Implementation Recovery and Data Fix

After an implementation there may be unforeseen and untested issues that require immediate resolution. Projected has the skills and experience to quickly identify and resolve any post implementation issues and assist with data fixes.

Major Issue Resolution

Projected has helped a number of clients resolve major functional and technical issues, sometimes where even Oracle Support Services are unable to assist. Working systematically, the underlying problem is identified and either resolved utilising Projected's knowledge pool or by managing the progression of a SR (Service Request) with Oracle.

Testing

Projected offer flexible solutions for Oracle applications testing requirements. We can design a full application test program, design and write detailed test scripts, manage and execute testing. We have wide-ranging experience in all aspects of testing including system, integration, user acceptance, and regression testing.

Value Added Products

To maximise the benefits of your Oracle Projects solution, Projected have a number of value added products available. These products can be purchased separately or as part of your implementation service.

- Report Packs
- Interface Solutions
- Solution Extensions
- Accounting Solutions
- Accrual Solutions
- Reconciliations

Project Management Services

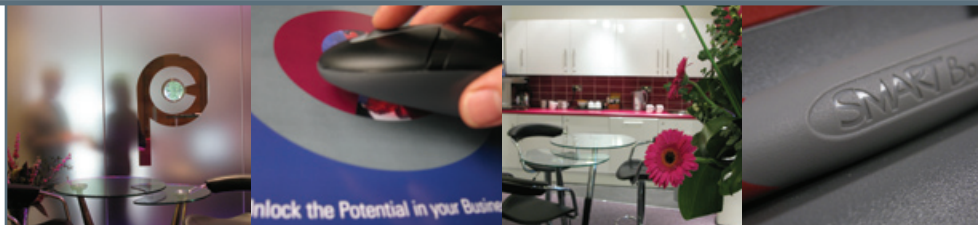

Whether it is a new implementation, upgrade or expanding the footprint of your Oracle solution, strong management and clear leadership is the key to a successful project.

Whatever the size or scope of your project, we have experienced Project Managers to provide the necessary co-ordination and focus required to ensure the job is completed successfully.
